1) Go to the AppStore and download the client & install.

https://apps.apple.com/sg/app/forticlient/id1474294106

2) Once the installation is complete search the FortiClient and open the client.
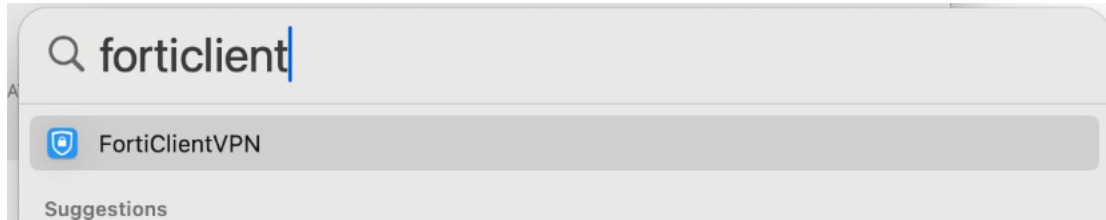

3) Click on the "Connection".
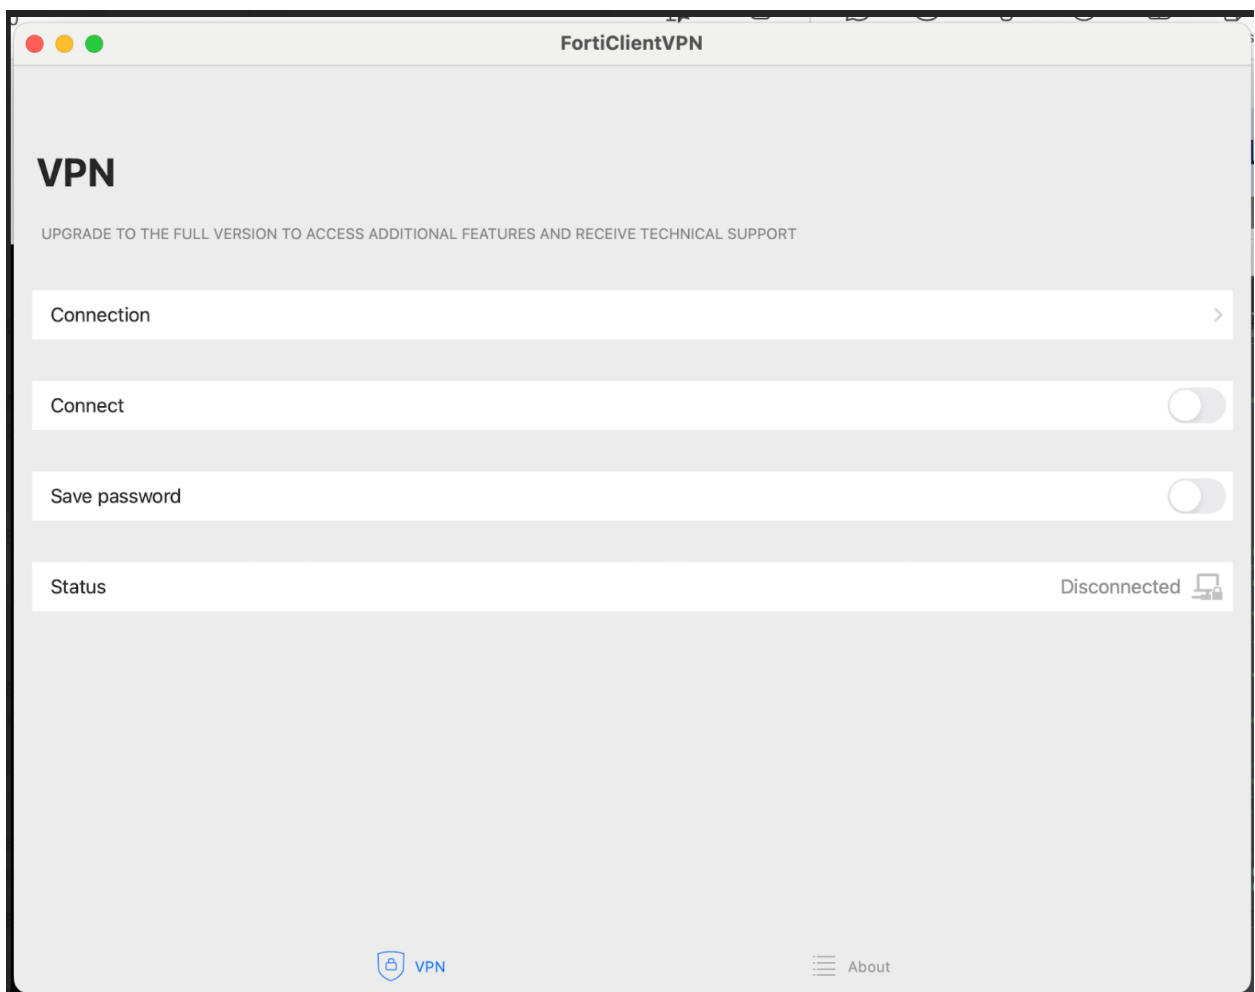

4) Click on the "Add Configuration"

5) Configure SSL VPN Based on below print screen:
   a. Name: *<Add Connection Name for VPN>*
   b. Server Address: https://203.127.135.251:10833
   c. Port: 10833

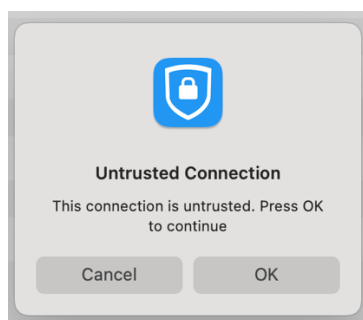

6) Click "Save" followed by "Done". Then go back to previous screen.
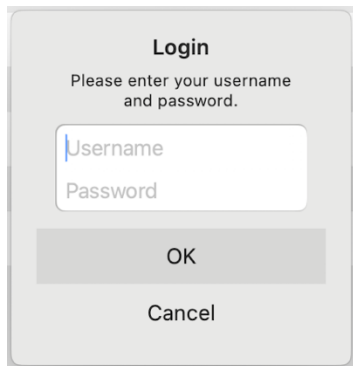

7) Connect on "Connect" button.
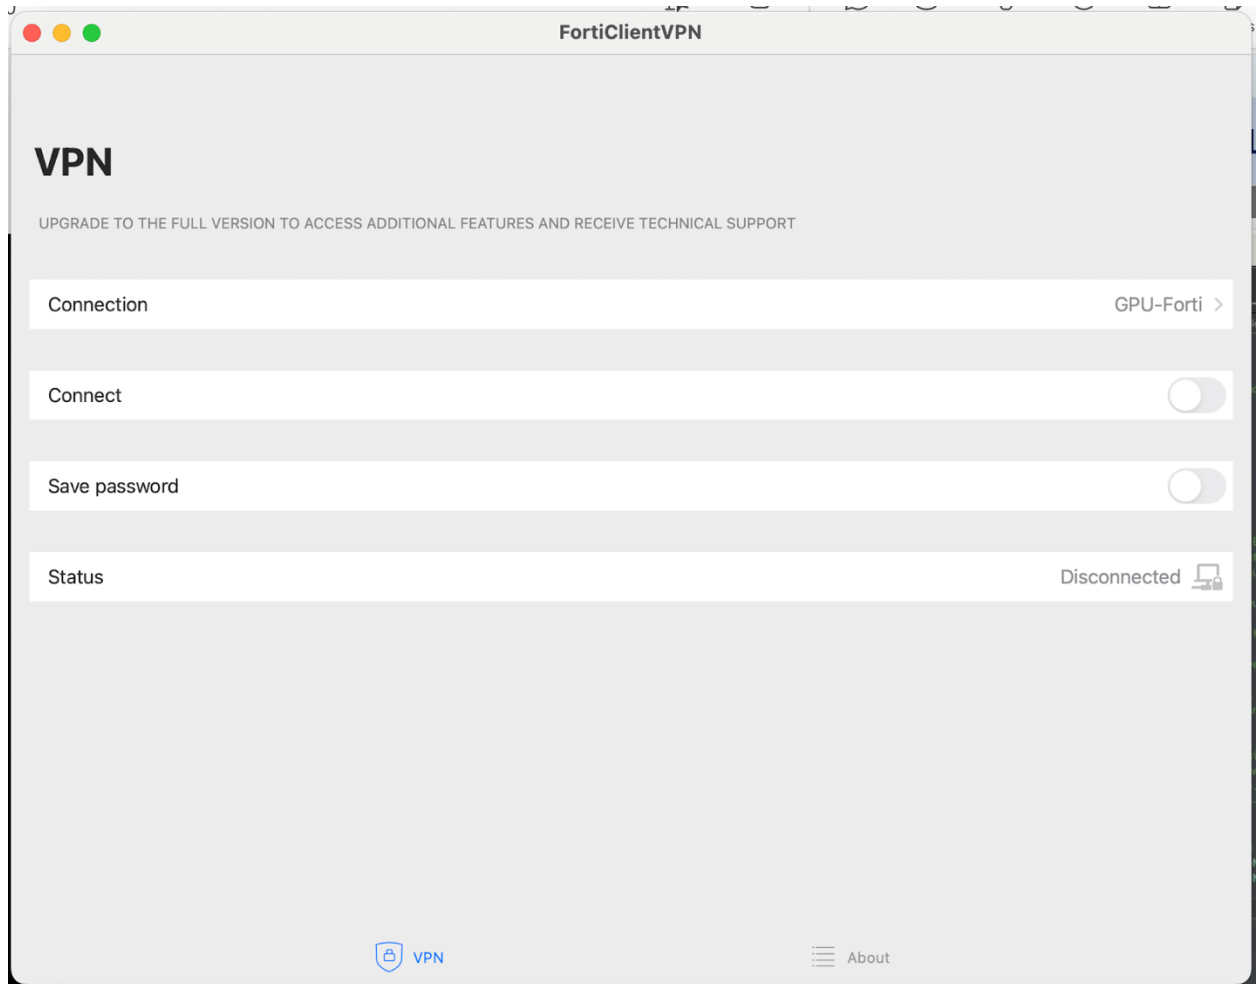

8) Click "OK" to accept the certificate.

9) Enter your username and password

10) Once the VPN is connected successfully, you will see the status as "Connected".
